upheard

St/2 sure that something these people have responsibility,
for, i.e. a large body of people of varying backgrounds
is uneasy & "nervous" upheaval & dissent is further
exacerbated which may be prelude to large
unrest & turmoil. People nevertheless are worried,
perplexed, but also slightly annoyed or angry,
partly because they're ~~not~~ confused as to how to
deal with the problem. They're not accustomed
to things happening outside an orderly
plan. ~~This unrest~~ These incidents of unrest
are a growing problem that began sometime
previously with ^{very} minor disturbances, ~~but~~ which were
regarded as a passing phase of the target population
but have been steadily growing more acute & now
the "powers that be" have become seriously
concerned.

54/2 insufficient funding. Serious shortage of finance. Confusion as to the system that provides funds is mixed up and control + accountability is muddled. These people are feeling a bit under siege at present because several major issues are not working to their expectations + some chronic crises are not being resolved. Pussan is being put on them to fix things + they don't see a clear way of doing it.

Present concerns are with domestic problems which have occupied them for some time - probably a few weeks. They anticipate being thus occupied for some time more - perhaps a couple of weeks - but fully expect to resolve current issues + some move on to other, future projects or agenda.
